

THICK SHAKE / SLUSH MACHINE

ENCON Thick Shake/Slush Machines are a high technology machine designed to obtain high profits with low operating costs and easy to use and handle. They guarantee a perfect hygiene comparable to international standard machines.

Notable Feature's :

- Refrigerated mix tank thermostatically controlled with a capacity of 10 litres .
- Stainless steel freezing cylinder with capacity of 8 litres.
- Cylinder feeding, Gravity System for overrun.
- Overnight storage of mix at right temperature, thus energy saving up to 50% and reduces compressor-motor wear and tear.
- Consistency of product, checked by an H-O-M control device.
-
- A stirrer included to mix/blend syrup and base, a perfect thick milk shake is prepared in seconds.
- Parts easy to be removed and cleaned.
- Air cooled refrigerating unit.
- Elegant looks.

There is only a single model of this machine, which can make thick shake or slush as desired. This machine is fitted within an **imported compressor** and a few imported electrical parts to reduce the size of the machine and increase its efficiency. The front panel is beautified with the use of the latest printing technology.
